

Dear Education Committee members,

Please join me in supporting Bill #5283, equalizing funding for ag programs with other school choice programs, so more students can enroll in ag programs in the future.

Supporting our children's educational interests is investing in the future of our communities without limitations. Invest in our children. Open the doors. Allow them to explore opportunities and career paths leading to successful and fulfilling lives. The investment is truly rewarding and worth every penny spent.

Sincerely,

Colleen & Eric Kieseewetter
